

I thoroughly enjoy XM Radio and do not want to see them impeded by conventional AM or FM radio not the NAB. I have purchased 3 XM radio receivers - that is all that my partner and I ever listen to.
As a former FCC employee - I retired from the FCC - I think it would be a travesty to interfere with their freedom to broadcast and compete.

Please leave XM alone! If FM or AM radio want to compete - match the XM programming and do away with the commercialism that have become hall marks of the NAB.

XM is to 2004 as FM was to the 1950s. Everything else is old hat.
